Meeting Notes

Initial Build

- Layout and colors are looking great
- I enjoy the hover effect of the photos, the thick white frame and growing transition help to communicate the polaroid/physical photograph vibe
- The various combinations of text and background colors are contributing to a slightly vintage vibe, but I feel like this could be emphasized with a more retro typeface or more textural elements
- How does one navigate to the separate pages? Will there be a button that can be clicked in each section? Will the layout of those pages be similar to the home page?
- A lot of the language in the body text is pretty advanced and drops a lot of scientific names. Maybe lightly edit the text to keep super scientific terminology to a minimum? But right now I'm liking the informative tone.
- Other elements could be added to make this more interactive and fun, like fun facts sections or little notes on each bear, right now the image hover effect is a great start and what I want to see more of!

More playful interactive elements, could be small changes in hover states. More distinctive differentiation between each subspecies and type of bear. Emphasis on retro aesthetic through increased use of retro-style typefaces, colors are a great start.
